

Estimating Sums

Goal Estimate in addition situations.

1. Estimate the number of riders.

Number of Riders

Day	Roller coaster	Spin-a-wheel
Monday	215	347
Tuesday	268	553

Estimates will vary. Examples are given.

- a) on Monday $\underline{\hspace{2cm} 550 \hspace{2cm}}$
 b) on Tuesday $\underline{\hspace{2cm} 850 \hspace{2cm}}$
 c) on the roller coaster $\underline{\hspace{2cm} 500 \hspace{2cm}}$

2. Write addition sentences to show 2 ways to estimate the total number of spin-a-wheel riders in Question 1.

$$\underline{\hspace{10cm} 300 + 600 = 900 \hspace{10cm}}$$

$$\underline{\hspace{10cm} 350 + 550 = 900 \hspace{10cm}}$$

3. Estimate each sum. Write the addition sentence for the estimate.

a) $324 + 378$ $\underline{\hspace{10cm} 300 + 400 = 700 \hspace{10cm}}$

b) $176 + 217$ $\underline{\hspace{10cm} 200 + 200 = 400 \hspace{10cm}}$

c) $538 + 129$ $\underline{\hspace{10cm} 550 + 125 = 675 \hspace{10cm}}$

4. Circle the best estimate for $352 + 356$.

A. $400 + 400$

B. $300 + 300$

C. $300 + 50 + 300 + 50$

5. a) Use one colour to circle 2 numbers below whose sum is between 500 and 600. (circled in black)

- b) Use another colour to circle 2 different numbers below whose sum is between 500 and 600. (circled in grey)

(295)

(274)

(453)

317

374

(95)

At-Home Help

You use easy-to-add numbers to estimate sums. The numbers can be rounded to the nearest multiple of 10, 100, or 25. You can round both numbers or only one number.

For example, $126 + 149$ could be estimated as

- $130 + 150 = 280$ by rounding to the nearest 10
- $125 + 150 = 275$ by thinking about quarters
- $126 + 150 = 276$ by rounding only one number

Adding with Base Ten Blocks

Goal

Add 2-digit and 3-digit numbers using concrete materials.

Museum Visitors

Time	Number of visitors
10 a.m. – 11 a.m.	137
11 a.m. – 12 p.m.	158
12 p.m. – 1 p.m.	212

1. Draw the base ten blocks you would use to model each number.

a) 137 

b) 158 

c) 212 

2. Complete the chart.

	Time period	Blocks to show total number of visitors	Number of visitors
a)	10 a.m. – 12 p.m.	_____ 2 _____ hundreds _____ 8 _____ tens _____ 15 _____ ones	295
b)	11 a.m. – 1 p.m.	_____ 3 _____ hundreds _____ 6 _____ tens _____ 10 _____ ones	370
c)	10 a.m. – 1 p.m.	_____ 4 _____ hundreds _____ 9 _____ tens _____ 17 _____ ones	507

At-Home Help

Base ten blocks representing hundreds, tens, and ones can be used to model addition.

$323 + 38$ is shown as 3 hundreds, 5 tens, 11 ones.

Regroup the 11 ones as 1 ten 1 one to get 3 hundreds, 6 tens, 1 one. So $323 + 38 = 361$.

Adding 2-Digit and 3-Digit Numbers

Goal Add 2-digit and 3-digit numbers using pencil and paper.

1. Estimate each sum. Then calculate.

Estimates will vary. Examples are given.

a) $137 + 152$

Estimate $\underline{290}$ Calculate $\underline{289}$

b) $238 + 134$

Estimate $\underline{370}$ Calculate $\underline{372}$

c) $372 + 153$

Estimate $\underline{525}$ Calculate $\underline{525}$

2. Diane has 138 pennies in one piggy bank and 285 pennies in another. How many pennies does she have in all?

423 pennies

3. Add.

a)
$$\begin{array}{r} 318 \\ + 219 \\ \hline 537 \end{array}$$

b)
$$\begin{array}{r} 164 \\ + 65 \\ \hline 229 \end{array}$$

c)
$$\begin{array}{r} 538 \\ + 149 \\ \hline 687 \end{array}$$

d)
$$\begin{array}{r} 447 \\ + 384 \\ \hline 831 \end{array}$$

4. Marg needs 500 stamps to win a prize. She has 329. Her sister gives her 175. Does she have enough now? Show your work.

Yes.
 $329 + 175 = 504$
 504 is greater than 500.

5. The same digit goes in each place. What is the missing digit?

$4 \underline{8} \underline{8} + 3 \underline{8} \underline{8} = \underline{8} 76$

At-Home Help

To add 2-digit and 3-digit numbers, find the total numbers of ones, tens, and hundreds. Regroup where necessary.

For example,

$$\begin{array}{r} 11 \\ 456 \\ + 78 \\ \hline 534 \end{array}$$

14 ones is 1 ten 4 ones.
 13 tens is 1 hundred 3 tens.

Communicate a Solution to a Problem

Goal

Explain a solution to a problem.

Solve this problem. Explain each of your steps. Use the Problem-Solving Steps and the Communication Checklist.

- Ben and Glynis used 177 building block pieces to build 2 robots. Glynis used 21 more pieces than Ben. How many pieces did Ben use?

For example:

Understand the Problem: Ben's number of pieces and Glynis's

number of pieces add to 177. Glynis's number is 21 more than Ben's.

Make a Plan: I will try guessing and testing different numbers.

Carry Out the Plan:

Ben 100	Glynis 121	Total 211	(too high)
---------	------------	-----------	------------

Ben 50	Glynis 71	Total 121	(too low)
--------	-----------	-----------	-----------

Ben 80	Glynis 101	Total 181	(just 4 to high)
--------	------------	-----------	------------------

I will give each person 2 fewer pieces.

Ben 78	Glynis 99	Total 177	(correct)
--------	-----------	-----------	-----------

So Ben used 78 pieces.

At-Home Help
Problem-Solving Steps

- Understand the Problem
- Make a Plan
- Carry Out the Plan

Communication Checklist

- Did you show all the steps?
- Did you explain your thinking?

Estimating Differences

Goal Estimate in subtraction situations.

1. 500 bottles are needed to win a prize. About how many more bottles does each student need to collect?

Student	Devon	Mona	Rebecca
Bottles collected	89	217	264

Estimates will vary. Examples are given.

- a) Devon $\underline{\hspace{10em}}$ 400
 b) Mona $\underline{\hspace{10em}}$ 300
 c) Rebecca $\underline{\hspace{10em}}$ 200

2. Write subtraction sentences to show 2 ways to estimate how many more bottles Mona has than Devon in Question 1.

$$\underline{\hspace{10em}} \quad 200 - 100 = 100$$

$$\underline{\hspace{10em}} \quad 220 - 100 = 120$$

3. Estimate each difference. Write the subtraction sentence for the estimate.

- a) $413 - 218$ $\underline{\hspace{10em}}$ $400 - 200 = 200$
 b) $487 - 369$ $\underline{\hspace{10em}}$ $500 - 400 = 100$
 c) $614 - 168$ $\underline{\hspace{10em}}$ $600 - 200 = 400$

4. Circle the best estimate for $647 - 264$.

- A. $600 - 300$ B. $600 - 200$ C. $650 - 275$

5. a) Use one colour to circle 2 numbers below whose difference is between 300 and 400. (circled in black)

- b) Use another colour to circle 2 different numbers below whose difference is between 300 and 400. (circled in grey)

562 (158) (18) (397) (522)

At-Home Help

You use easy-to-subtract numbers to estimate differences. You can round to the nearest multiple of 10 or 100 and take away.

You can also round to the nearest multiple of 10 or 100 and count up. You can round both numbers or only one number.

For example, $539 - 278$ could be estimated as

- $500 - 300 = 200$ by rounding to the nearest 100 and taking away
- $540 - 280 = 260$ by rounding to the nearest 10 and counting up from 280: 20 to 300, 200 more to 500, and 40 more to 540
- $539 - 300 = 239$ by rounding only one number

Adding and Subtracting to Compare

Goal

Compare numbers using addition and subtraction.

1. Add on to solve each.

a) $430 - 382 = \underline{\quad 48 \quad}$

b) $421 - 389 = \underline{\quad 32 \quad}$

c) $211 - 178 = \underline{\quad 33 \quad}$

At-Home Help

With a subtraction question, you can add on to the number being subtracted or count back from the total.

For example, to calculate $316 - 291$

$316 - 291 = 25$

2. Jump back to solve each.

a) $431 - 397 = \underline{\quad 34 \quad}$

b) $525 - 484 = \underline{\quad 41 \quad}$

c) $477 - 389 = \underline{\quad 88 \quad}$

3. Draw a base ten block picture to show adding on to solve $417 - 161$. Write the difference. 256

Subtracting from 3-Digit Numbers

Goal Subtract from 3-digit numbers using pencil and paper.

1. Estimate each difference. Then calculate.

Estimates will vary. Examples are given.

a) $678 - 384$

Estimate 300 Difference 294

b) $714 - 328$

Estimate 400 Difference 386

c) $436 - 276$

Estimate 100 Difference 160

2. Derek has 138 nickels and 285 pennies in his piggy bank. How many more pennies does he have?

147 more

3. Subtract.

a)
$$\begin{array}{r} 318 \\ - 214 \\ \hline 104 \end{array}$$

b)
$$\begin{array}{r} 164 \\ - 25 \\ \hline 139 \end{array}$$

c)
$$\begin{array}{r} 538 \\ - 149 \\ \hline 389 \end{array}$$

d)
$$\begin{array}{r} 423 \\ - 388 \\ \hline 35 \end{array}$$

4. Megan has 371 stickers. She gives 145 away. How many does she have left?

226 left

5. The same digit goes in each place. What is the missing digit?

4 33 - 38 4 = 4 9

At-Home Help

To subtract from 3-digit numbers, find how many ones, tens, and hundreds are left.

Regroup where necessary.

For example,

$$\begin{array}{r} 3 \ 14 \\ \cancel{4} \ 16 \\ - \ 7 \ 8 \\ \hline 3 \ 7 \ 4 \end{array}$$

5 tens and 6 ones is
4 tens and 16 ones.
4 hundreds and 4 tens is
3 hundreds and 14 tens.

Adding and Subtracting Money

Goal

Add and subtract money using different methods.

1. What is the total cost of the items?

a) sandwich and soup

\$5.60

b) juice and sandwich

\$4.44

c) pie and milk

\$2.54

2. How much more does one item cost than the other?

a) milk than juice

\$0.26

b) sandwich than soup

\$1.30

c) soup than pie

\$0.86

3. Daniel has \$9.00. He wants to buy everything on the menu. Does he have enough money? Show your work.

No. For example, $\$1 + \$3 + \$1 + \$1 + \$2 = \8 and $29¢ + 45¢ + 25¢ + 15¢ - 1¢$ is more than $\$1$.

At-Home Help

When adding and subtracting prices, think of dollars, dimes, and pennies like hundreds, tens, and ones.

For example, to find the total of items costing \$1.39 and \$2.47, think

1 loonie + 3 dimes + 9 pennies and

2 loonies + 4 dimes + 7 pennies.

The total is 3 loonies, 7 dimes, and 16 pennies. Trade the pennies and the total is \$3.86.

To find out how much more an item that costs \$2.47 is than one that costs \$1.39, think

2 loonies + 4 dimes + 7 pennies is the same as

2 loonies + 3 dimes + 17 pennies.

If you compare this to

1 loonie + 3 dimes + 9 pennies, there is 1 more loonie and 8 more pennies. The difference is \$1.08.

Calculating Change

Goal Make purchases and change for amounts up to \$10.00.

You will need a calculator.

- Calculate the change.
 - You have \$5.00. A toy costs \$1.39.
The change is \$3.61 .
 - You have \$5.00. A ball costs \$2.89.
The change is \$2.11 .
 - You have \$10.00. A skipping rope costs \$3.19. The change is \$6.81 .

At-Home Help

You can use a calculator to figure out the change by subtracting the cost of the item from the amount of money you have.

\$3.89

Press

1	0	.	0	0	
-	3	.	8	9	=
6.11					

- Choose 2 items to buy at the Midtown Sports sale.
Answers will vary. Examples are given.

baseball and T-ball bat

- How much do the 2 items cost together? \$8.79
- What is your change from \$10.00 for the 2 items? \$1.21

- Find 3 items to buy that cost less than \$10.00 together.
T-shirt, flip-flops, and nose plug

- What is your change from \$10.00 for the 3 items? \$2.91

Choosing a Calculation Method

Goal

Choose the best way to add or subtract.

You will need a calculator.

- Circle in red 2 questions that you will calculate mentally.
Circle in green 2 questions that you will solve with a calculator.
Circle in blue 2 questions that you will solve on paper.
Solve each using the method you planned.

Methods will vary.

a) $318 + 199 = \underline{\quad 517 \quad}$

b) $468 + 357 = \underline{\quad 825 \quad}$

c) $201 - 198 = \underline{\quad 3 \quad}$

d) $314 - 103 = \underline{\quad 211 \quad}$

e) $153 + 224 = \underline{\quad 377 \quad}$

f) $800 - 362 = \underline{\quad 438 \quad}$

- Calculate using the method of your choice.

a)
$$\begin{array}{r} 372 \\ + 576 \\ \hline 948 \end{array}$$

c)
$$\begin{array}{r} 185 \\ + 526 \\ \hline 611 \end{array}$$

e)
$$\begin{array}{r} 409 \\ + 386 \\ \hline 795 \end{array}$$

g)
$$\begin{array}{r} 628 \\ + 149 \\ \hline 777 \end{array}$$

b)
$$\begin{array}{r} 526 \\ - 434 \\ \hline 92 \end{array}$$

d)
$$\begin{array}{r} 713 \\ - 299 \\ \hline 414 \end{array}$$

f)
$$\begin{array}{r} 465 \\ - 386 \\ \hline 79 \end{array}$$

h)
$$\begin{array}{r} 424 \\ - 202 \\ \hline 222 \end{array}$$

At-Home Help

How you add or subtract depends on the numbers.

You could add $312 + 99$ in your head. Think:

$$312 + 100 - 1 = 412 - 1 = 411$$

You might use a calculator to find $461 - 173$ because there is a lot of regrouping.

$$\boxed{4} \boxed{6} \boxed{1} \boxed{-} \boxed{1} \boxed{7} \boxed{3} \boxed{=} \boxed{288}$$

You might use paper when the numbers are easier.

$$\begin{array}{r} 325 \\ + 413 \\ \hline 738 \end{array}$$

Test Yourself

Circle the correct answer.

- Choose the best estimate for $339 + 278$.
A. 300 B. 400 C. 500 **D. 600**
- Which sum is about 700?
E. $360 + 478$ **F. $275 + 388$** G. $689 + 146$ H. $348 + 226$
- Which sum is 765?
A. $339 + 436$ **B. $248 + 517$** C. $382 + 483$ D. $389 + 486$
- What is $537 + 264$?
E. 801 F. 791 G. 701 H. 802
- Choose the best estimate for $723 - 179$.
A. 300 B. 400 **C. 500** D. 600
- Which difference is about 400?
E. $820 - 478$ F. $329 - 125$ **G. $806 - 387$** H. $679 - 212$
- Which difference is 266?
A. $642 - 276$ B. $781 - 565$ C. $502 - 368$ **D. $531 - 265$**
- What is $815 - 337$?
E. 378 **F. 478** G. 472 H. 372
- What is the total cost if one toy costs \$2.17 and another costs \$3.48?
A. \$5.65 B. \$5.56 C. \$5.55 D. \$6.65
- How much more is a T-shirt that costs \$8.57 than a pair of goggles that costs \$2.98?
E. \$5.59 F. \$5.57 G. \$6.59 H. \$6.57
- A pair of goggles costs \$2.98. How much change should Ann get from \$10.00 if she buys 2 pairs of goggles?
A. \$7.02 **B. \$4.04** C. \$6.98 D. \$4.08
